

Science Is All Around Us

# A WEEK IN POLAND

## 8-12 APRIL 2022

Erasmus+ By Romanian team

# First day

- The festive opening took place on the first day. Students from the participating countries showed videos depicting the local aspects of the Easter and Ramadan holidays. There were gift exchanges, product tastings from the participating countries, and knowledge games.

# Second day

- We went to Warsaw the next day. We went to the Royal Castle and the ancient city center, which had well-kept streets and buildings. The Tomb of the Unknown Soldier, the Palace of Culture, and the Space Museum are all places worth visiting. We formed friends on science day, and we realized once again that the world is available to those who want to learn about it.

# Third day

- We went to Lodz Science Museum, Planetarium, and Art Museum on the third day. We were delighted to have the opportunity to explore intriguing locations.

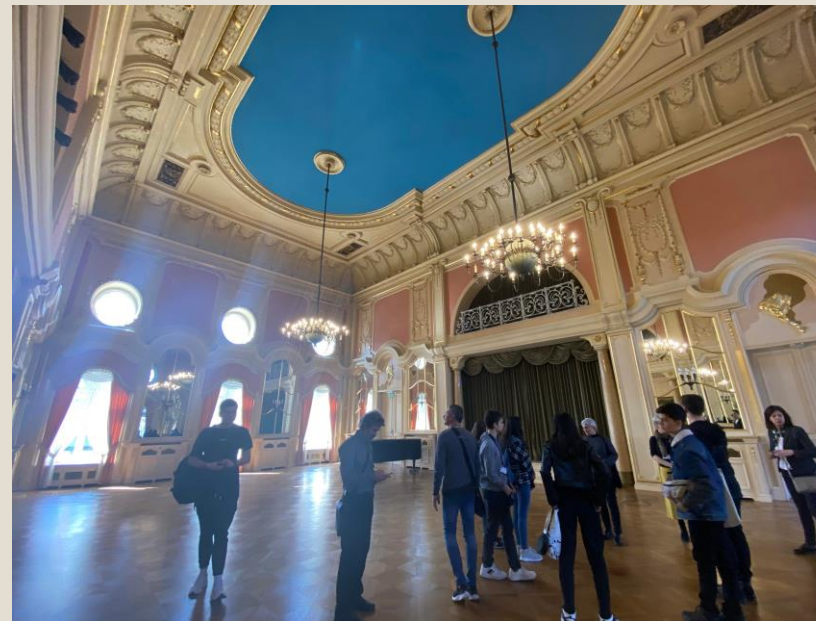

# Fourth day

- On the fourth day, an activity was organized an orienteering activity that involved discovering locations, guiding the students, using only a map, and then the students had fun with the laser-tag game.

# The last day

- New discoveries are still being made. We went to Museum of the City of Lodz- The Palace of Israel Poznanski. This exhibition tells the story of a city that has grown from a tiny local craft and agricultural center to a group of major European metropolises in just a few decades, in a fashion that is unparalleled on a worldwide scale. The strength of people who convert their dreams into acts can be found here.

***A message from Romanian team to every student who participated in this project:***

We are glad that we had the chance to come here and meet all of you, we had a very good time with you. We are thankful for this experience and for this amazing memories. WE LOVE YOU AND WE ARE GOING TO MISS YOU <3!

WE ARE ALSO  
GLAD THAT  
GEORGE FOUND  
HIS ID
